## **FOREWORD**

The Women and Men in Kenya booklet provides facts and figures on the status of women and men in Kenya. The booklet presents indicators focusing on the following: population, health, vital statistics, education, labour, poverty, financial access, agriculture, Information and Communication Technology (ICT), gender based violence, decision making, governance and Persons with Disabilities (PWDs).

The information is extracted from various publications produced by the Kenya National Bureau of Statistics.

I have no doubt that this booklet will be a useful resource material for gender programs designers, implementors, advocates, researchers and the general public to take forward the gender agenda in Kenya.

A handwritten signature in black ink, appearing to read 'Macdonald G. Obudho' with a stylized flourish at the end.

**Macdonald G. Obudho, MBS**  
**Director General**  
**Kenya National Bureau of Statistics**

## **MANDATE**

The Bureau is mandated by Statistics Act 2006 as the principal agency of the Government for collecting, analysing and disseminating statistical data in Kenya and shall be the custodian of official statistical information.

## **VISION**

To be a global leader in the provision of quality statistical services.

## **MISSION**

To provide, manage and promote quality statistical services through utilization of best practices for evidence-based decision making.

## Guide for Readers

The information in this booklet has been primarily extracted from the publications of the Kenya National Bureau of Statistics and other government departments and agencies. The sources are acknowledged beside each table or graph. Most tables and graphs provide absolute numbers and/or proportions (%) for certain attributes for both women and men; girls and boys. Some charts and graphs reflect both the absolute numbers and sex distribution for various groups. Minor discrepancies may appear between totals and partial figures due to rounding off. For more information and data quality, please refer to the list below on the sources quoted.

## CONCEPTS AND DEFINITIONS

### Gender

Gender is a socio-cultural construct of the society that determines and identifies, roles or functions, entitlements and deprivation of women and men, and girls and boys in the society. Gender classification changes with time, space and needs of a society.

### Sex

Sex is a biological identification of females and males based on their physiological characteristics. Sex characteristics are natural; compared to gender which identifies qualities that are shaped through the history of social relations and interactions.

### Gender Equality

Gender equality refers to equal access of resources and benefits by women and men. This accelerates the growth of individuals, development of countries and evolution of societies.

### Gender Equity

Gender equity denotes the equivalence in life outcomes for women and men, recognizing their different needs and interests and requiring a redistribution of power and resources.

### Equality in Education

Women and men, girls and boys in Kenya should have the same opportunities and conditions in matters education. There is need to empower both women and men through quality education at all levels for personal development and contribute meaningfully to society.

### Equal Distribution of Power and Influence

Equal distribution of power and influence ensures that women and men have the same rights and opportunities to be active citizens and be able to take part in decision-making in the society.

## **Financial Equality**

Women and men must have the same opportunities and terms as regards paid work that provides financial independence throughout their lives.

## **Gender Mainstreaming**

This is an organizational strategy to bring a gender perspective to all aspects of an institution's policy and Gender Equality.

## **Women's Issues**

Refers to opportunities, challenges and constraints that affect women and girls only. Women's needs are, therefore, not addressed by relevant organs at all levels due to poor representation and this affects women.

## **Gender Gaps**

Gender gaps refer to the measure of differences between women and men concerning their participation in and benefits from different socio-economic sectors. Gender gaps come about as a result of unequal power relations between women and men.

## **Gender Equality and Statistics**

Women and men should be visible in statistics. For this to be possible, statistics must be disaggregated by sex. However, statistics disaggregated by sex alone are not sufficient in addressing gender equality issues. This gives a clear picture of the real situation as it is on the ground through the available data and showing existing gaps.

## **Gender Parity Index**

The Gender Parity Index (GPI) is a socio-economic index usually designed to measure the relative access to education for both females and males. It is calculated as the ratio of the number of female students enrolled at primary, secondary and tertiary levels of education to the number of male students in each level.

## **Gender Development Index (GDI)**

This is a tool designed to measure gender inequalities in the social, cultural, economic, and political fields.

### **Important dates for Women in Kenya since 1950s**

- 1952** First African women's organization formed (MYWO)
- 1955** First group of women admitted to University of Nairobi
- 1958** First African woman joins the Legislative Council
- 1959** First African woman becomes president of the giant MYWO
- 1960** First African woman ventures into broadcasting
- 1961** First African woman attends the Lancaster constitutional talks in London
- 1963** Women given the right to vote
- 1964** First group of African women joins the trade union movement
- 1964** Equality opportunity act established
- 1964** Maternity leave granted for women
- 1964** Basic pension adopted for women
- 1967** First woman magistrate appointed
- 1968** First woman appointed mayor
- 1969** First woman becomes Member of Parliament
- 1969** First woman appointed District Officer
- 1971** First woman in East and Central Africa earns PhD
- 1974** First woman appointed Assistant Minister
- 1976** Establishment of the Women's Bureau
- 1982** Appointment of the First woman judge to the High Court of Kenya
- 1983** First women appointed to head public parastatal

- 1984** First woman Ambassador appointed
- 1986** First woman elected as clergy (PCEA)
- 1986** First woman appointed to senior diplomatic mission
- 1987** First woman Permanent Secretary
- 1993** House allowance granted to women in the public sector
- 1995** First woman appointed to the cabinet
- 1995** First female Kenyan pilot
- 1997** First woman vies for presidency
- 1999** First woman appointed Provincial Commissioner
- 2004** First African (Kenyan) woman to qualify to captain a commercial aircraft
- 2005** First woman appointed to chair WTO's general council
- 2011** First Woman appointed Deputy Chief Justice of Kenya
- 2013** First woman appointed as Deputy Inspector General of Police
- 2017** First Three Women elected as Governors
- 2017** First Two Women elected as Senators
- 2017** Kenyan government adopts the basic education amendment bill that was signed into law making it mandatory for the government to supply free, sufficient and quality sanitary towels to every girl child registered and enrolled in a public basic education institution
- 2021** Launch of the National Policy on Gender and Development, 2019
- 2021** Launch of the Women Economic Empowerment Strategy 2020-2025

- 2021** Launch of the Revised National Policy on the Eradication of Female Genital Mutilation Policy (2019)
- 2021** First Woman appointed Chief Justice of Kenya

## Population/Demography

Demography is the statistical and mathematical study of the size, composition, and spatial distribution of human populations, and of changes over time in these aspects through the operation of the five processes of fertility, mortality, marriage, migration and social mobility. Demography is useful for governments and private businesses as a means of analyzing and predicting social, cultural, and economic trends related to population.

**Population-** Group of individuals of same species living in the same geographic area at the same time.

### Trends in population, 1969-2019

### Sex Ratio by age groups, 2019

Source: KPHC, 2019

**Sex ratio** refers to the proportion of males to females in a population expressed by the number of males per 100 females. If the sex ratio is higher than a 100 it means that there are more males than females.

### Distribution of female and male headed households, 2019

(sex distribution, per cent)

Source: KPHC, 2019

### Trends in Singulate Mean Age at Marriage (SMAM), 1989-2019

Source: KPHC, 1989-2019

**Singulate Mean Age at Marriage (SMAM)**- the average length of single life expressed in years among those who marry before age 50.

### Percentage distribution of population by marital status, 2019

Source: KPHC, 2019

### Trends in Total Fertility Rate, 1989-2019

Source: KPHC, 1989-2019

**Total Fertility Rate (TFR)** – The number of live births a woman would have if she were subject to the current age-specific fertility rates throughout her reproductive period (age 15-49).

### Trends in Median Age at First Birth (MAFB), 1989-2019

Source: KPHC, 1989-2009

*Median Age at First Birth (MAFB) refers to the average age in which women have their first born child.*

### Total Fertility Rate by education level, 2019

Highest Level of Education Completed	Total Fertility Rate (TFR)
Primary	3.5
Secondary	2.9
Tertiary	2.8
None/Never Attended	4.0
Other (Informal)	3.8

## Health and Vital Statistics

Health information enables decision-makers at all levels of the health system to identify problems and needs, make evidence-based decisions on health policy and allocate resources. It is also necessary in monitoring progress in achieving the set targets such as, immunization for children and assistance during delivery and place of delivery for expectant mothers among others.

	At home	Health facility	Other
2003 KDHS	58.7	40.1	0.8
2008-09 KDHS	56.2	42.6	1.0
2014 KDHS	37.4	61.2	1.0

Source: KDHS (2003, 2008/09 and 2014)

### HIV/AIDS Incidence and prevalence among adults age 15-64 years, 2018

Source: KENPHIA, 2018

**HIV/AIDS Incidence** – HIV/AIDS incidence is the estimated number of persons newly infected with HIV during a specified time period (e.g., a year).

**HIV/AIDS Prevalence** – This is the percentage of people living with HIV/AIDS in a defined population at a specific time. It is the number of persons living with HIV disease at a given time regardless of the time of infection or the stage of HIV disease.

### Percentage distribution of individuals with knowledge of HIV prevention

	Using condoms		Limiting sexual intercourse to one uninfected sexual partner		Using condoms and limiting sexual intercourse to one uninfected sexual partner	
	Female	Male	Female	Male	Female	Male
2003 KDHS	61.0	72.0	80.5	88.8	57.8	69.9
2008-09 KDHS	74.7	81.1	91.5	92.9	70.9	77.7
2014 KDHS	79.8	87.6	91.6	94.2	76.6	84.8

Source: KDHS (2003, 2008/09 and 2014)

### Child nutrition status

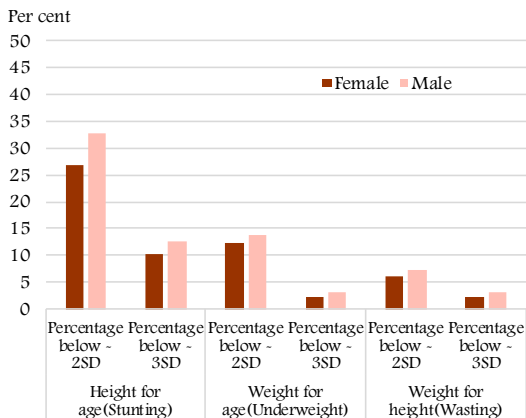

**Height-for-age (Stunted) Index** – provides an indicator of linear growth retardation and cumulative growth deficits.

**Weight-for-height (Wasted) Index** - measures body mass in relation to body weight or length and describes current nutritional status.

**Weight-for-age (Under-weight)** - is a composite index of height-for-age and weight-for-height. It takes into account both chronic and acute malnutrition. Children whose weight-for-age is below minus two standard deviations (-2 SD) are classified as underweight. Children whose weight-for-age is below minus three standard deviations (-3 SD) are considered severely underweight.

## Labour Force

Labour force consists of all persons in the working age population who are either employed or unemployed. These are persons in the age group 15 – 64 years.

**Labour Force Participation Rate** – is a measure of the extent of a country's working-age population who are in total labour force. It is an indicator of the level of labour market activity and is computed as a ratio of the labour force to the working age population.

**Employed** – include persons who reported that they did some work during the reference period or they held a job even if they were not doing any work at the time. It also includes persons who were on leave or had a business to return to.

**Unemployed** – include persons who during the reference period were without work but were currently available for work, and were actively seeking work.

**Employment Rate** – the proportion of a country's working age population that is employed.

**Paid employees** – Persons working for a public or private employer and can receive remuneration in wages, salaries, commission, tips, piece-rates or pay in kind.

**Working employers** – Persons who operate their own businesses, agricultural farms, engage in pastoralist activities or engage independently in a profession or trade, and hire one or more employees.

**Own account workers** – Persons who operate their own businesses, agricultural farms, engage in pastoralist activities or engage independently in a profession or trade, and hire no employees.

**Contributing family worker** – also known as unpaid family worker is a person who works without pay in an economic enterprise operated by a relative.

**Apprentice** – Trainees who may be directly engaged in producing goods and services or may simply be learning by observation without actually performing any significant productive tasks.

**Working Children** – Persons age 5-17 years engaged in non-schooling activities either for pay, profit or family gain.

## Poverty

**Poverty Incidence** – Is the proportion of families/individuals with per capita income/expenditure less than the per capita poverty threshold to the total number of families/individuals.

**Severity of Poverty** – This is a measure of how poor a poor person is compared to another person.

**Poverty Headcount Rate** – This is a measure of the proportion of the population that cannot afford the basic basket of goods measured by the food and overall poverty lines.

**Poverty Gap Index** – This is a measure of depth of poverty. It provides information on how much poorer the poor people are relative to the poverty line. This measure captures the average expenditure shortfall, or gap, for the poor relative to the poverty line.

**Multidimensional poverty**–encompasses various deprivations experienced by the poor people in their lives such as lack of education, poor health and inadequate living standards among others.

## Financial Access and Usage

Financial access, includes the ability to access transactions, credit and investment products and services from formal financial institutions. Access to finance has positive effects in reducing income inequality and the poverty ratio.

Financial usage means that individuals and businesses have access to useful and affordable financial products and services that meet their needs – transactions, payments, savings, credit and insurance – delivered in a responsible and sustainable way.

Affordable access to and use of financial services helps families and small business owners generate income, manage irregular cash flow, invest in opportunities, and work their way out of poverty.

### Access to financial services and products, -Formal, 2006-2021

Source: *FinAccess, 2021*

**Formal financial services and products** - Financial services and products used through prudentially regulated service providers and are supervised by independent statutory/regulatory agencies (CBK, CMA, IRA, RBA and SASRA); or through service providers that are subject to non-prudential oversight by government departments/ministries with focused legislations or statutory agencies; or through providers that are legally registered and/or operate through direct government interventions.

### Access to financial services and products- Informal, 2006-2021

Source: FinAccess, 2021

**Informal financial services and products** - Financial services and products through forms not subject to regulation but have a relatively well-defined organizational structure.

## Access to financial services and products- excluded, 2006 -2021

Source: FinAccess, 2021

*Excluded access to financial products and services – The use of financial services only through family, friends, neighbours or keep in secret places.*

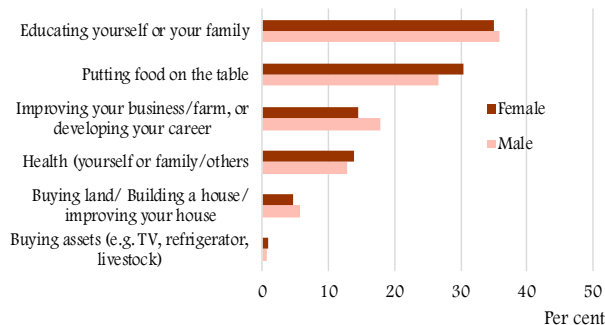

## Proportion of individuals who access financial services by type of service provider, 2016 and 2019

Financial service provider	2016		2019	
	Female	Male	Female	Male
Bank	31	47	34	48
Insurance (including NHIF)	17	30	25	38
Mobile money	68	76	76	83
MFI	5	3	2	2
SACCOs	10	17	9	14
Informal group	51	31	37	23
Pension	..	..	7	8
Digital Apps Loans	..	..	8	17

Source: FinAccess, 2019

**Microfinance institutions (MFIs)** - Microfinance institutions (MFIs) are organizations that offer financial services to low income populations. Almost all MFIs give loans to their members, and many offer insurance, deposit and other services. They have no oversight from the CBK.

### Need-based financial priority, 2019

Source: FinAccess, 2019

## Percentage distribution of individuals by financial health, 2019 and 2021

Source: FinAccess, 2019 and 2021

**Financial health** - This is the financial well-being of a household/ a person, or the extent to which the household/ a person uses financial products and services in a way that advances their well-being and enables them to meet their needs.

## Sources of financial advice, 2019 and 2021

## Agriculture

Agriculture is the process of producing food, feed, fiber and many other desired products by the cultivation of certain plants and the raising of domesticated animals.

Agriculture plays a critical role in the entire life of a given economy. In addition to providing food and raw material, agriculture also provides employment opportunities to a very large percentage of the population.

**Agricultural Household** - A household in which at least one member of the household is operating a holding (farming household) or when the household head, reference person or main income earner is economically active in agriculture

### Distribution of agricultural households by sex of the household head and area of residence, 2019

(sex distribution, per cent)

## Information and Communication Technology

Information and Communication Technology (ICT), is the infrastructure and components that enable modern computing.

ICT incorporates electronic technologies and techniques used to manage information and knowledge, including information-handling tools used to produce, store, and process, distribute and exchange information.

### Proportion of persons age 3 years and above owning/using selected ICTs by area of residence, 2019

	National		Rural		Urban	
	Female	Male	Female	Male	Female	Male
Mobile phone ownership	47.0	47.6	40.3	40.7	62.0	63.2
Use of mobile phone	55.2	55.1	48.2	47.9	70.7	71.4
Use of Internet	20.2	25.2	11.4	16.2	39.9	45.4
Use of Computer	9.4	12.0	4.7	6.5	19.9	24.4

Source: KPHC, 2019

### Proportion of individuals age 3 years and above owning mobile phone by age group, 2019

Source: KPHC, 2019

### Proportion of individuals age 15 years and above who engaged in E-commerce by area of residence, 2019

Source: KPHC, 2019

**E-commerce:** Is the sale or purchase of goods or services, whether between businesses, households, individuals, governments, and other public or private organizations, conducted over computer-mediated networks. The goods and services are ordered over those networks, but the payment and the ultimate delivery of the good or service may be conducted on or offline.

**Proportion of potential E-commerce users (15 years and above) by area of residence, 2019**
